SUMMARY

Full-stack Software Engineer with 2 and 1/2 years of professional software development experience and over a decade of experience in web app development. I am passionate about learning new things to quench my insatiable thirst for learning. Seeking a junior to mid level software engineering role near **Richmond, VA** or remote.

HARD SKILLS

Programming Languages JavaScript/TypeScript, Golang, HTML5, CSS3, Java, SQL, Shell/Bash, Ruby, Nim
Frameworks and Tools Angular, Tailwind CSS, React, Spring Boot, Ruby on Rails, Git, Docker, Nix, Caddy, Linux

PROFESSIONAL EXPERIENCE

Akytech Consulting, ATIS (Army Training Information System)

Fort Eustis, VA (Remote)

Software Developer

Jan. 2023 - Aug. 2025

- Designed, developed, and maintained 4 mission-critical Army training applications (Central Army Registry (CAR), TRADOC Application Gateway (TAG), My Training Tab (MT2), and Training Development Capability (TDC)) serving over 200,000 monthly users, enhancing training accessibility and efficiency.
- Refactored and optimized codebases across 3 front-end sites (TypeScript, Angular, TailwindCSS, Angular Material UI) and back-end systems (Java, JRuby, Ruby on Rails, Microsoft SQL Server).
- Debugged and enhanced Java and Spring back-end systems, improving performance and reliability for high-traffic applications.
- Automated developer workflows using Bash and Batch scripts, streamlining processes and reducing setup time.
- Authored and optimized PL/SQL and T-SQL queries and stored procedures, improving database performance and reporting capabilities.
- Enhanced user interfaces based on user feedback, implementing accessibility improvements which resulted in increased user satisfaction.
- Collaborated to co-author reference materials, ensuring clear documentation for end-users and developers.
- Adhered to strict security protocols and completed 12+ annual training programs, ensuring compliance with Department of Defense standards.
- **Technologies:** TypeScript, Angular, Tailwind CSS, Java, Spring, JRuby, Ruby on Rails, Microsoft SQL Server, Bash, Tomcat, GraphQL, Azure Cloud

Amazon, RIC9

Ashland, VA

Fulfillment Associate

Oct. 2020 - Jan. 2023

- Provided support for team members who process returns, with a focus on teamwork excellence
- Drove forklift in warehouse to unload trucks, moved boxes from conveyor belts, scanned and moved totes from belts and wrapped for shipment

OPEN SOURCE PROJECTS

Epos Programming Language ([github.com/epos-lang/epos](#) — [epos-lang.org](#))

Oct. 2025

- Implemented a lexer, parser, type-checker, and code-generator for a functional statically-typed programming language that compiles to LLVM IR.
- Created documentation site with Tailwind CSS, Python, Jinja templating, Typst, and Nix
- **Technologies:** Golang, Nix, LLVM

Cranberry ([github.com/silent-brad/cranberry](#) — [silent-brad.github.io/cranberry](#))

Nov. 2025

- Built a templating markup language for Haskell
- Technologies: Haskell, HTML, CSS, Nix

Tactical UI (github.com/silent-brad/tactical-ui — silent-brad.github.io/tactical-ui)

Nov. 2025

- Designed ... an open source CSS user interface library
- Technologies: CSS3

Book Sharing App (github.com/silent-brad/bookshelves)

Sep. 2025

- Developed and designed frontend, backend API, reverse proxy, devops infrastructure, and database for a book sharing app.
- **Technologies:** TypeScript, Java, Angular, Spring Boot, Tailwind CSS, SQLite, Caddy, Nix

Lambda Calculus Interpreter (github.com/silent-brad/lambda-calc)

Oct. 2025

- Implemented a lambda calculus interpreter in Haskell to learn about functional programming.
- **Technologies:** Haskell, Lambda Calculus, Nix

CERTIFICATIONS

Security+ Certification, CompTIA

May. 2023

CLEARANCE

Active Public Trust Security Clearance

Til Aug. 2027
